Overview
The CS100 measures barometric pressure for the range of 600 to 1100 mb. This range equates to from below sea level (as in a mine) up to 12,000 feet above sea level. Designed for use in environmental applications, the CS100 is compatible with all Campbell Scientific dataloggers.

Benefits and Features
- Optimized to mount in Campbell Scientific enclosures
- Low power consumption
- Three-year warranty
- 500 to 1100 millibar and 800 to 1100 millibar versions also available by special order—contact Campbell Scientific
- Integral switching circuit limits power consumption to the measurement cycle

Technical Description
The CS100 is a Campbell Scientific version of Setra’s model 278 barometer. It uses Setra’s Setraceram capacitive sensor and IC analog circuit to measure barometric pressure. The CS100 includes a 0.76 m (2.5 ft) cable and a terminal strip for datalogger power and signal connections.

The CS100 is encased in a stainless steel and polyester case fitted with an 1/8 in. barbed fitting for pressure connection. It has an internal switching circuit that allows the logger to power the barometer only during measurement, which reduces power usage.

Accessories

The following accessories are used when the barometer will be housed in a different enclosure than the datalogger.

ENC100  17 cm (6.7 in) by 14 cm (5.5 in) enclosure for housing only the CS100. Includes a backplate, compression fitting, vent, and mounting bracket.

CABLE5CBL-L  5-conductor, 24 AWG cable with drain wire and Santoprene jacket. Enter cable length, in feet, after the -L. Must choose a cable termination option (see below).

Cable Termination Options (choose one)

-PT  Cable terminates in pigtails for direct connection to datalogger's terminals.
-PW  Cable terminates in a connector for attachment to a Campbell Scientific prewired enclosure.
